New Traffic Pattern on Southbound Capital Circle NW begins Sunday, August 7, 2016

Beginning at 6 p.m. Sunday, August 7, there will be a new traffic pattern on southbound Capital Circle NW to accommodate the installation of underground utilities in the area. Starting immediately south of Tharpe Street, the outside and middle travel lanes on southbound Capital Circle NW will be sequentially closed and all traffic will be placed on the inside through lane. This one-lane pattern will continue south through the Capital Circle NW/West Tennessee Street intersection. A right turn only lane onto westbound West Tennessee Street will be maintained. This new pattern will be clearly marked and access to area businesses will be maintained at all times. There will be no change to the northbound travel lanes on Capital Circle NW.

Motorists are urged to obey posted speed limits and to use caution when traveling through the area. Note: All activities are weather dependent and may be delayed or re-scheduled in the event of inclement weather.

If you have questions, please contact Blueprint at 850-219-1060.
